

Reproduktorové kabely Inakustik Reference LS-1002

The Reference LS-1002 consists of four wires in the CC-297 design. The conductors are arranged in double symmetry each with 37 concentrically stranded wires. The large cross-section ensures a wider base and depth.

KEY-FEATURES

- ⊗ Quatro CC-297 design; 4 x 2.97 mm²
- ⊗ Double-symmetrical design
- ⊗ 37 wires concentrically stranded per conductor
- ⊗ DUO-PE II insulation around each conductor
- ⊗ PE network jacket reduces micro-vibrations and capacitance
- ⊗ Low induction for homogeneous reproduction

♦TONECOLOUR

Each and every cable has its very own characteristic, even its own „character“, which is selected in its very own timbre. This is because of its technical construction and the materials used for its manufacturing. The diagram shows how the described cable is positioned and where and what are its strong points. The indicated rating by numbers is based on our best knowledge and experience, as well as our own statistical calculations. It should give you some solid and easy to comprehend guideline, which should also be helpful to compare various products and to serve as a profound assistance for your selection and purchasing decision.

Reference LS-1002

Note: The subjective sound characteristics depend also on the connected components in use.
